1.(a) When the transportation is for physically handicapped or isolated students and the district school board has elected to provide for the transportation of the student through written or oral contracts or agreements.

2.(b) When the transportation is a part of a comprehensive contract for a specialized educational program between a district school board and a service provider who provides instruction, transportation, and other services.

3.(c) When the transportation is provided through a public transit system.

4.(d) When the transportation is for mid-day trips to and from school sites and agricultural education sites or for trips to and from agricultural education-related events and competitions. ~~When the transportation of students is necessary or practical in a motor vehicle owned or operated by a district school board other than a school bus, such transportation must be provided in designated seating positions in a passenger car not to exceed 8 students or in a multipurpose passenger vehicle designed to transport 10 or fewer persons which meets all applicable federal motor vehicle safety standards.
